

Samsung Freeform 4 Battery Replacement

Here is how to quickly replace the battery in this phone.

Written By: Todd

INTRODUCTION

Here is how to quickly replace the battery in this phone.

Sorry for some blurry pictures, I had the wrong macro setting on!

Step 1 — Battery

- Your device lies here, waiting for the battery.

Step 2

- Put your fingernail in the little slot at the top, and just pull back. It doesn't require much force. There is nothing you can break really, so pull!

Step 3

- The rear cover removed, lying next to rest of the phone.

Step 4

- Pick up the battery at the end, and lift away.
- If installing the battery, align the arrow with the three silver contacts, and drop it in. Put the rear cover over the back, and give it a gentle push.

To reassemble your device, follow these instructions in reverse order.
